595x595mm

Partial wall installation

You can also use this method to install this product on the ceiling.

Full wall installation

*You can also use this method to install this product on the ceiling.

1

Measure wall height in both sides. Take the smallest height.

**2**

Based on the smallest height, calculate if it is necessary to cut one of the panels to fill the entire wall height. Check for continuity between panels before cutting.

3

Glue the Velcro tape in the wall. It is recommended to use 2 stripes of Velcro per panel (included). You can also glue the panels directly to the wall with Flexi Glue Ultra

4

Start the installation from the bottom-right side (If cuted panels are going to be used it is recommended to start with these). Check if panels are leveled before proceeding to next row.

5

Install the remaining panels.

6

VMT boards can be installed vertically or horizontally, depending on the pattern and desired orientation.
